

Active Collab vs other top project management tools

Task management

Organize tasks into task lists that fit your workflow.

Collaboration

Collaborate with your team by discussing work on tasks.

Time tracking

Track time you spend working on tasks.

Invoicing

Create invoices in under a minute from tracked time.

Project budgeting

Track project budget on projects and control your costs.

Resource planning

See who has too much work and how much time you have.

Gantt timeline

See how tasks interact a Gantt-like timeline.

Kanban board

Move tasks across columns like cards on a Kanban board.

Flexible task view

Switch between Kanban and Gantt view anytime, mid-project.

Advanced report

Get all the business data you need using filters.

Self-hosting

Host software on your own server and pay only once.

All projects in one view

See all your projects on one timeline so you can plan better.

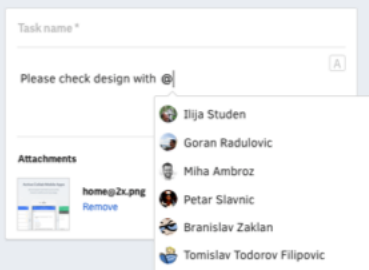

Client permissions

Control what your clients can do.

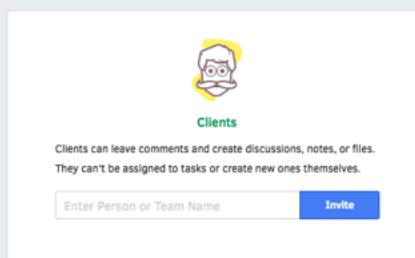

Active Collab helps you:

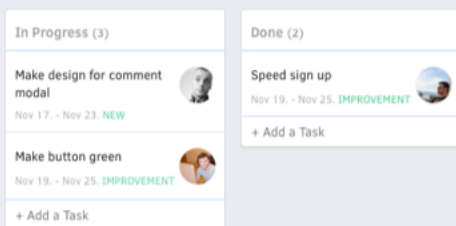

Collaborate with your team

Collaborate with your team from one place using comments and discussions so everyone can stay up-to-date.

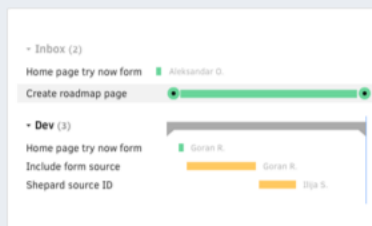

Work with clients

Give your favorite clients extra permissions so they can assign tasks and be an assignee.

Flexible task management

Plan projects using a Gantt-like timeline and then switch mid-project to a Kanban board for easier task management.

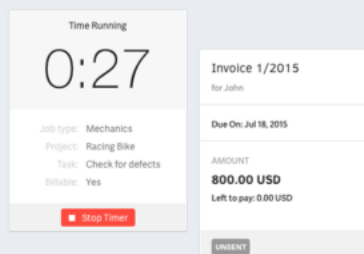

Plan and track resources

See all your projects on one timeline so you can better plan projects and manage resources.

Track time

Track time on tasks so you always know how much time and money you're putting in a project.

Quickly issue invoices

Invoice your billable hours in under a minute and send professional-looking PDFs that clients can pay on-line.

+ SSL encryption, daily backups, support via chat, email or phone.

What Active Collab customers are saying

For more than 10 years, we've been trusted by over 200,000 people

HARVARD
UNIVERSITY

★★★★★ The most comprehensive tool so far

by Michel Müller, CEO & Creative Director at Sergeant

"Over the past 10 years I worked with several online project management, collaboration and accounting tools, including Basecamp, Harvest/Forecast, Freshbooks, Trello, Asana, Teamwork, Podio, Wrike, etc. Two years ago we started working with Active Collab, and it is the most comprehensive tool so far. Compared to all other tools out there, it does the best job."

★★★★★ It saved us so much time, it's insane

by Méderic Beaunier, CEO & Founder at aparticula

"In the beginning, we only used Active Collab to manage tasks and to-dos. But soon, we started storing information and files in it. But the greatest breakthrough was when we started using the invoicing section - it saved us so much time, it's insane."

★★★★★ Active Collab came up trumps in everything

by Alice Jakins, Digital Traffic Manager at New Media Publishing

"I put together a feature matrix for all the different tools to compare things like monthly cost, accessibility, timesheeting, task assignments, template creation, calendar timings, recurring tasks, moving and reordering tasks, multiple assignees... Active Collab came up trumps."

★★★★★ We centralize so much work with just one tool

by David Robertson, Owner & Project Manager at Premium IT Solutions

"Active Collab has everything we need to manage projects and collaborate - we can even track time and invoice billable time with it. It was exciting when we discovered Active Collab as we could centralize so much work with just one tool."
